

Journal Names Quiz

by Laura King, MA, ELS

Directions: In reference listings, journals are abbreviated according to the US National Library of Medicine's (NLM's) current Fact Sheet (Construction of National Library of Medicine title abbreviations at <http://www.nlm.nih.gov/pubs/factsheets/constructitle.html>). Commonly referenced journals and their abbreviations are included in *Abridged Index Medicus*. The NLM abbreviations used in MEDLINE are based on the *American National Standard for Information Sciences—Abbreviation of Titles of Publications* (ANSI Z39.5) (1985), as well as abbreviations formulated under earlier ANSI guidelines. The NLM abbreviations should be used for words that appear in journal titles. Single-word journal titles are not abbreviated. Articles, conjunctions, prepositions, punctuation, and diacritical marks are omitted in the abbreviated title form. In the following references, edit the journal names based on the information outlined in section 14.10 of the *AMA Manual of Style*. PubMed and other Internet sources can be used to verify the references, such as the list of journal titles in the NLM catalog at <http://www.ncbi.nlm.nih.gov/nlmcatalog/journals>.

1. Zimmer Z, Martin LG, Jones BL, Nagin DS. Examining late-life functional limitation trajectories and their associations with underlying onset, recovery, and mortality. *Series B, Psychological Sciences and Social Sciences, Journals of Gerontology*. 2014;69(2):275-286.
2. Stingley S, Schultz H. Helmsley Trust support for telehealth improves access to care in rural and frontier areas. *Health Affairs*. 2014;33(2):336-341.
3. Vranceanu AM, Bachoura A, Weening A, Vrahas M, Smith RM, Ring D. Psychological factors predict disability and pain intensity after skeletal trauma. American Volume. *Journal of Bone & Joint Surgery*. 2014;96(3):e20. doi:10.2106/JBJS.L.00479.
4. Tao QQ, Sun YM, Liu ZJ, et al. A variant within FGF1 is associated with Alzheimer's disease in the Han Chinese population. *American Journal of Medical Genetics Part B: Neuropsychiatric Genetics*. 2014;165(2):131-136.
5. Dula AN, Virostko J, Shellock FG. Assessment of MRI issues at 7 T for 28 implants and other objects. *AJR*. 2014;202(2):401-405.
6. Williams H. On the edge of the film.... *Education and Practice Edition of the Archives of Disease in Childhood*. 2014;99(1):41. doi:10.1136/archdischild-2013-305044a.
7. Vlachadis N, Iliodromiti Z, Creatsas G, Vrachnis N. Preterm birth time trends in Europe: the worrying case of Greece. *British Journal of Obstetrics and Gynaecology*. 2014;121(3):372-373.
8. Isong IA, Rao SR, Holifield C, et al. Addressing dental fear in children with autism spectrum disorders: a randomized controlled pilot study using electronic screen media. *Clinical Pediatrics*. 2014;53(3):230-237.

9. Linden T, Manas J, Buzachero V, Naas P, Fox D. High-value health care: achieving success and demonstrating results. *Hospitals & Health Networks/AHA*. 2013;87(12):45-55.
10. Cao LH, Luo DG, Yau KW. Light responses of primate and other mammalian cones. *Proceedings of the National Academy of Sciences*. 2014;111(7):2752-2757.
11. Cimino JJ, Overby CL, Devine EB, et al. Practical choices for infobutton customization: experience from four sites. *Proceedings of the American Medical Informatics Association Annual Symposium*. 2013;2013:236-245.
12. Bodewes R, van de Bildt MW, van Elk CE, et al. No serological evidence that harbour porpoises are additional hosts of influenza B viruses. *PLOS One*. 2014;9(2):e89058. doi:10.1371/journal.pone.0089058.
