Print Publication Year: 2007 Published Online: 2009

Publisher: Oxford University Press

ISBN: eISBN:

DOI: 10.1093/jama/9780195176339.021.235

Item type: section

Some of the terms described in this section are specific to ophthalmology, and others have special usage requirements in ophthalmology. See also , Correct and Preferred Usage of Common Words and Phrases. *adnexa oculi* Although often used as a synonym for eyelids, the term *adnexa oculi* (which is plural) properly includes the eyelids, lacrimal apparatus, and other appendages of the eye and should be used with its inclusive meaning. *diopter* The diopter is a measure of the power of an optical lens and is the reciprocal of the focal length in meters. Diopter is abbreviated D when used with a
