Editorial Policy and Procedures for Detecting and Handling Allegations of Scientific Misconduct

Annette Flanagin

Print Publication Year: 2007 Published Online: 2009

Publisher: Oxford University Press

ISBN: eISBN:

DOI: 10.1093/jama/9780195176339.022.166

Item type: section

Detection of scientific misconduct in publishing is often the result of the alertness of coworkers and/or other authors of the same manuscript, and much less commonly by editors, peer reviewers, or readers. If an allegation of scientific misconduct is made in relation to a manuscript under consideration or published, the editor has a duty to ensure confidential and timely pursuit of that allegation. According to the International Committee of Medical Journal Editors (ICMJE), “If substantial doubts arise about the honesty and integrity of work, either submitted or published, it is the editor’s responsibility to ensure that the question is appropriately pursued.”
