Item type: section

Parallelism may rely on accepted cues (either/or, neither/nor, not only/but also, both/and). All elements of the parallelism that appear on one side of the coordinating conjunction should match corresponding elements on the other side. Note: Either/or is used with only 2 comparators (use with more than 2 items is considered nonstandard). Note: Avoid the use of nor when the first negative is expressed by not or no. |
